

Please reject the NAB's petition 04-160.  
XM radio is a paid by subscriber service, and I am entitled to receive whatever services XM radio wants to provide to me as a subscriber. I choose to listen to or disregard its channels, just as I choose to listen to or disregard broadcast channels.

Broadcasters who fear XM should look instead at their own programming rather than asking for artificial protections.

Again, please reject the NAB's petition 04-160.
